TARGET CUING INFORMATION
REMOTE VIEWING (RV) SESSION #CD41

(S) The Remote Viewer was only provided with the target coordinates at the beginning of the session. The facilitator had originally been directed to indicate to the viewer that the target was a building, but decided only to provide that indication if the viewer did not appear to be on the target. Once the session began and the viewer was determined to be on the target (a building), the facilitator then requested he enter the building (which he described) and report on both the contents as well as the ongoing activity if any.
